ADVANCING KNOWLEDGE FOR SUSTAINABILITY

Asia AEC Forum seeks to advance a shared vision for the future of transport infrastructure, focused on improving the entire lifecycle of assets through digital technologies that make infrastructure smarter, more resilient, sustainable, integrated, and future-ready. Building on a sustained industry focus on digital transformation in infrastructure development, the Forum continues to evolve as a key industry platform shaping how design, engineering, construction, and operations adopt and integrate digital tools and practices across the lifecycle, enabling better planning, delivery, operation, and long-term performance of transport infrastructure systems.

INSIDE ASIA AEC FORUM 2026

60+
Industry Thought Leaders

500+
Decision-Makers & Delegates

15+
Insight-Led Conference Sessions

150+
Leading Organizations

10+
Countries Represented

WHY ASIA. WHY NOW.

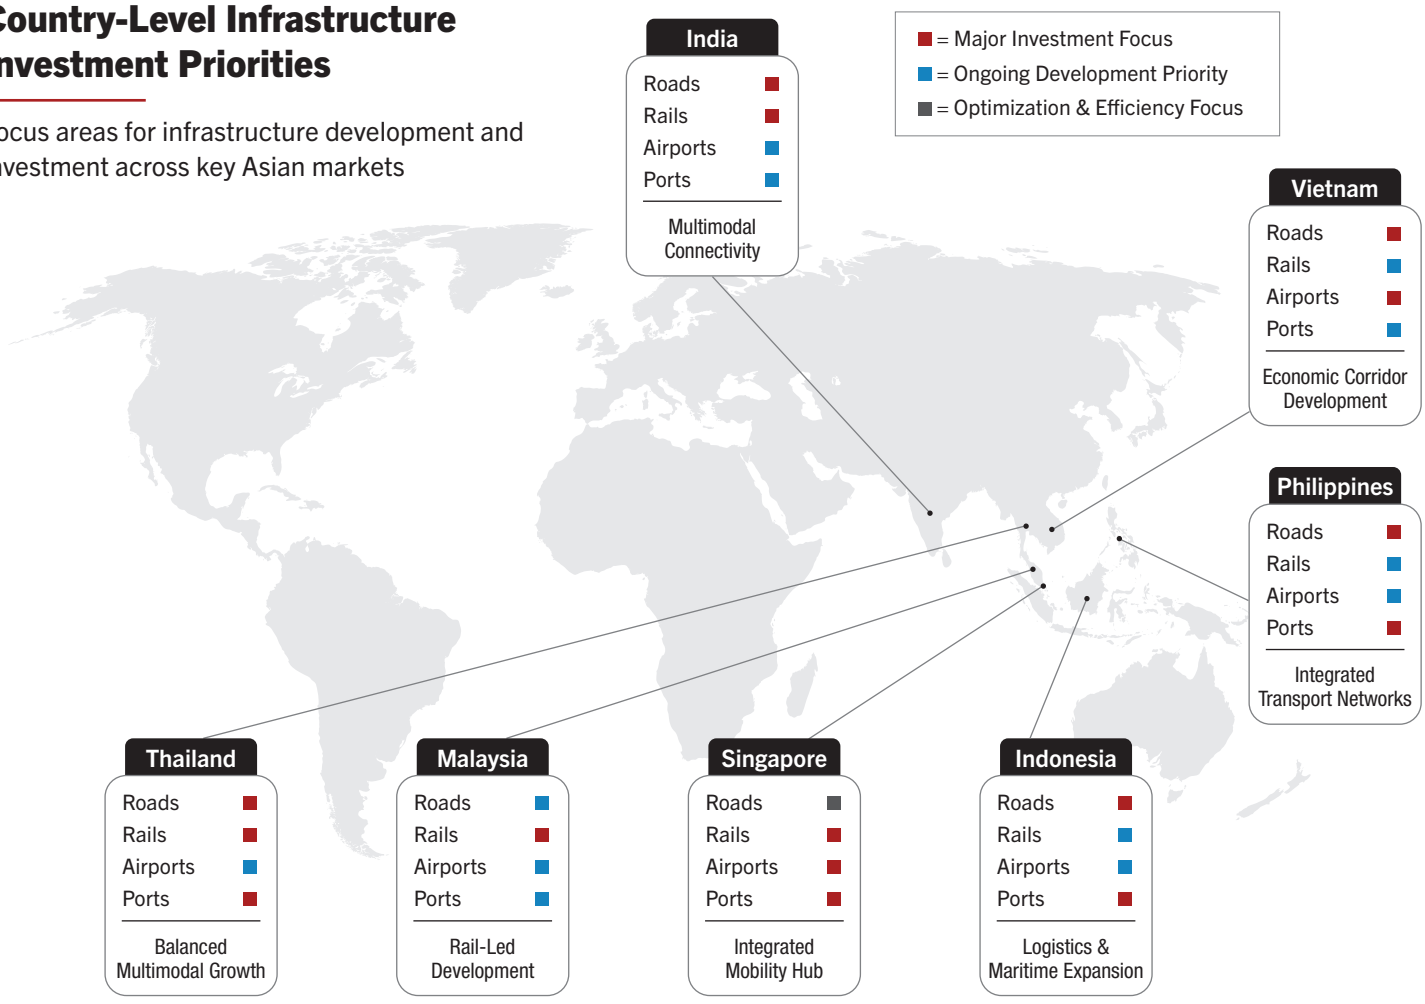

Asia-Pacific is the world's largest infrastructure growth market. With governments accelerating spend, digital transformation mandates expanding, and private capital seeking deployment, the region's transport AEC sector represents an unparalleled commercial opportunity.

The APAC AEC market is projected to grow from USD **9.63 trillion** in 2026 to **USD 11.31 trillion** by 2030, while the APAC Transport AEC market is expected to reach **USD 3.51 trillion** over the same period.

GEOSMART INDIA 2026

CONFERENCE | EXPO

16 – 18 Decmber 2026 | Bharat Mandapam, New Delhi

GeoSmart India 2026 Conference & Expo envisions geospatial intelligence as a foundational layer of India's digital public infrastructure. Aligned with the National Geospatial Policy 2022 and the National Geospatial Mission, it convenes policymakers, industry, academia, and technology innovators to advance a secure, innovation-driven ecosystem for data-led governance and infrastructure development.

This creates a direct interface between the Architecture, Engineering, and Construction ecosystem and the wider geospatial and digital infrastructure community enabling access to decision-makers, technologies, and partnerships shaping the future of built environment delivery.
