

# *Overview of National Spatial Data Infrastructure (NSDI) Framework and National Geospatial Data Assets (NGDA) GeoGov 2024*

**Ken Shaffer**

Deputy Executive Director

Federal Geographic Data Committee

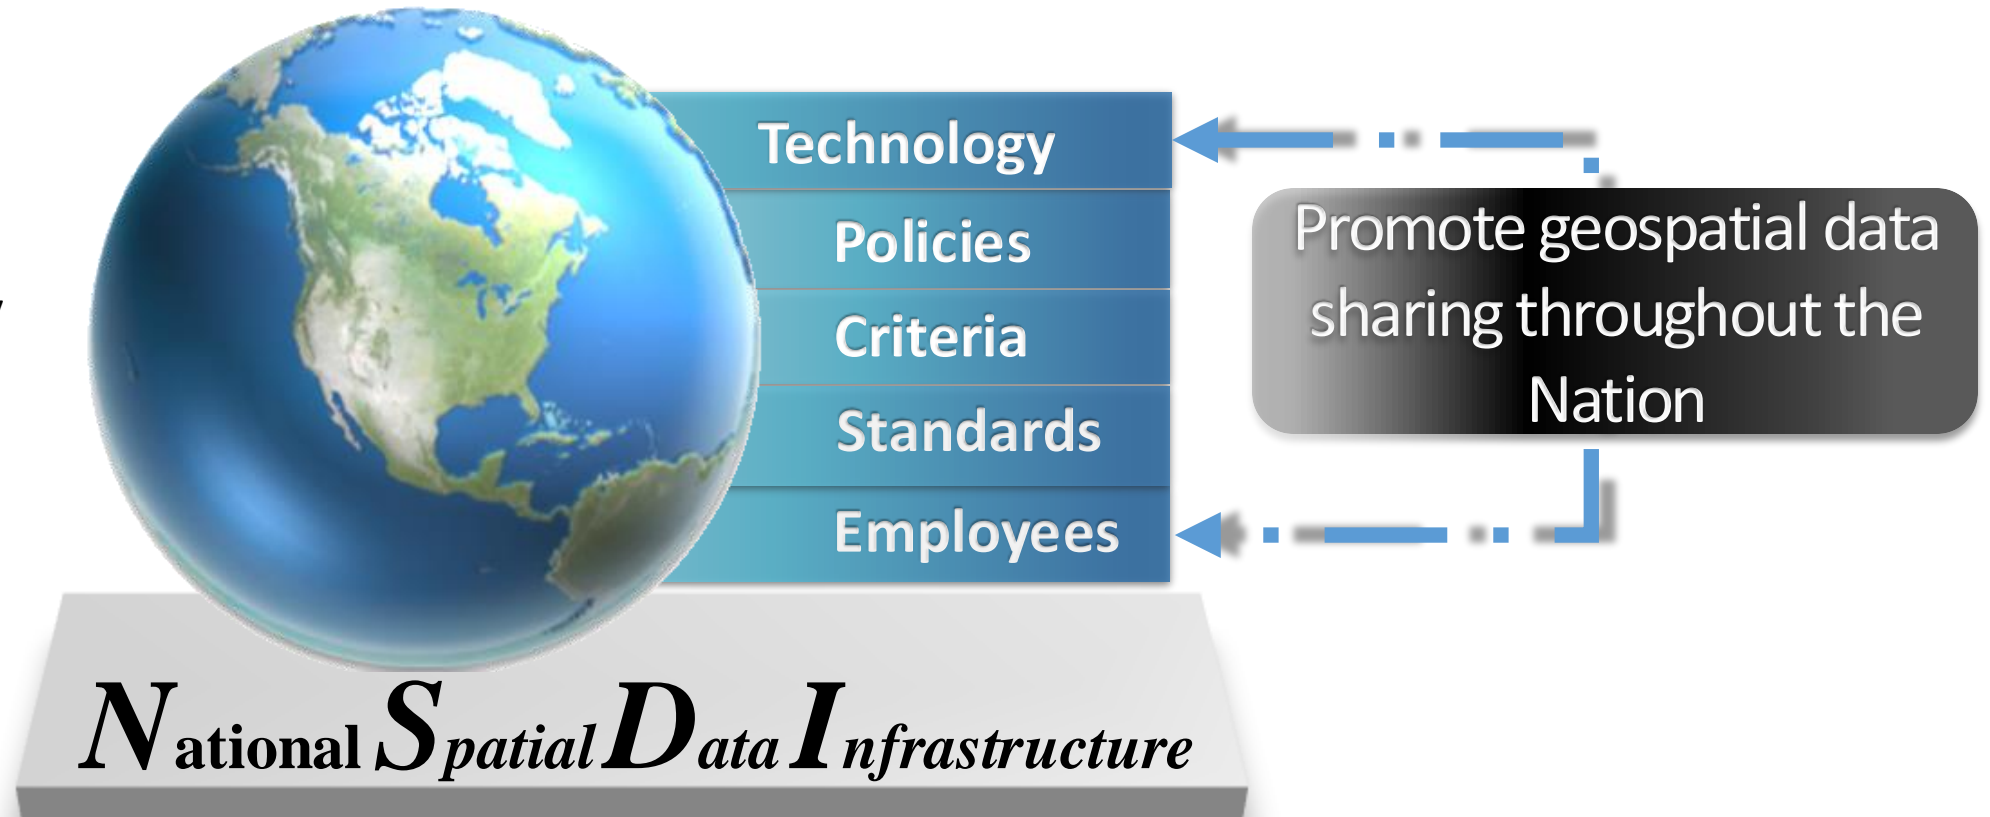

*12 September 2024*

# National Spatial Data Infrastructure (NSDI)

## Data Conditions:

- Partnerships
- Leadership
- Resourcing
- Program / Mission / Business driver
- Planning
- Data content
- Use requirements
- Goals / metrics

...

The NSDI “shall ensure that **geospatial data from multiple sources** (including the covered agencies, State, local and Tribal governments, the private sector and institutions of higher education) **is available and easily integrated** to enhance the understanding of the physical and cultural world”.

[Geospatial Data Act of 2018](#)

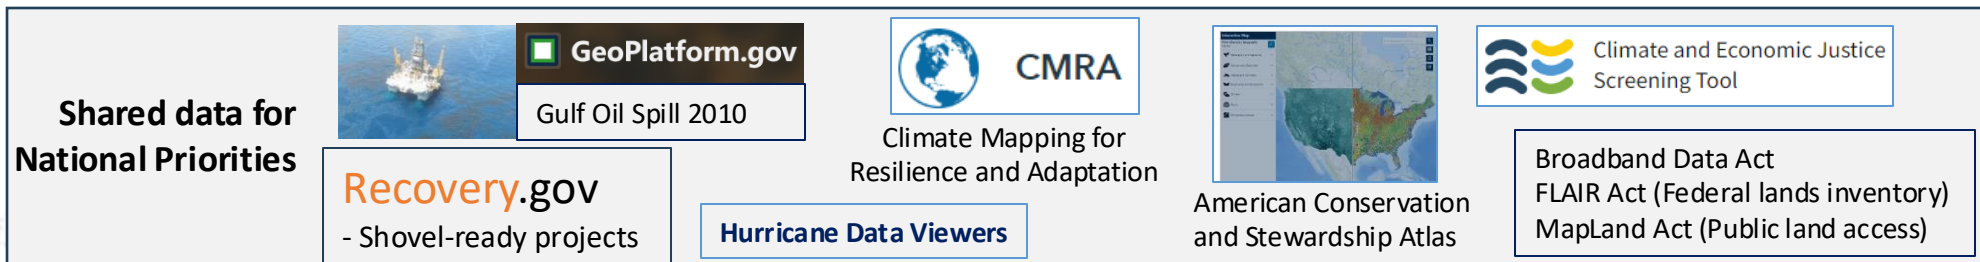

# Data in Geospatial Policy, Planning, and National Priorities

## Policy

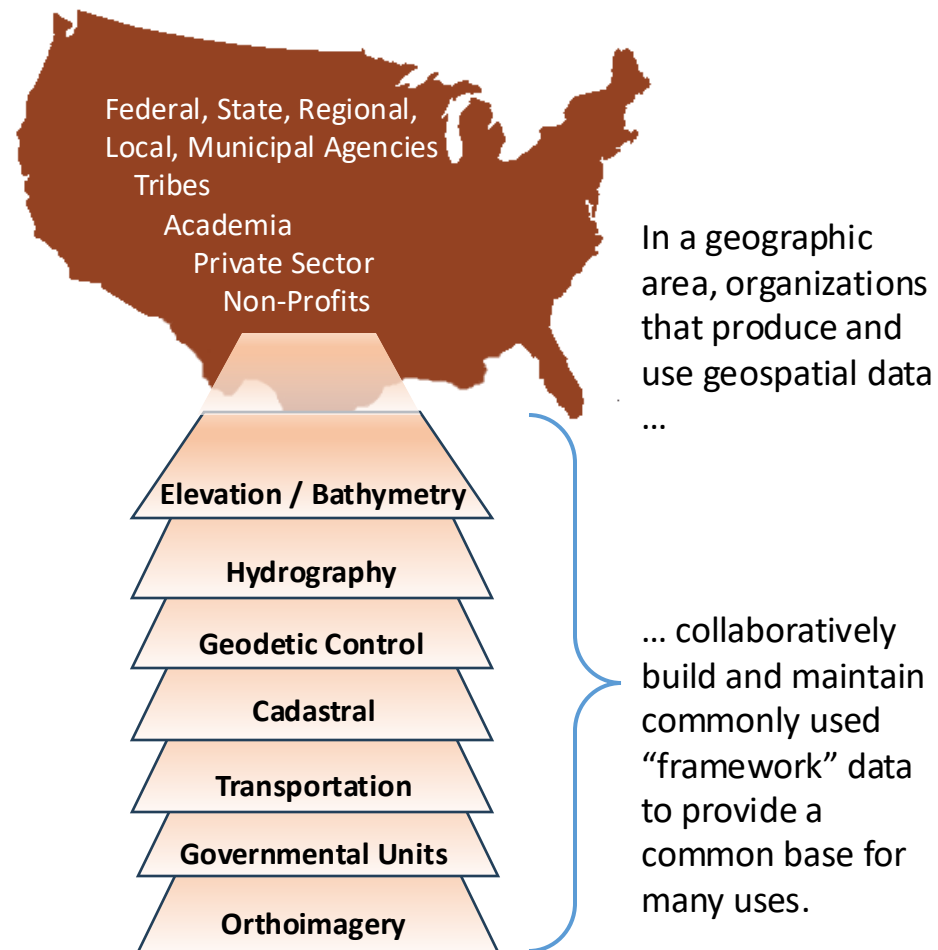

## Planning

NSDI Cooperative Agreements Program (CAP) 1994-2012 (Framework Category)

# NSDI Framework – 1997

- 7 Themes of digital geographic data that are commonly used
- Procedures, technology, and guidelines that provide for integration, sharing, and data use
- Institutional relationships and business practices that encourage the maintenance and use of data
- “Data you can trust” – the best available data for an area, certified, standardized, and described to a common standard
- **Provides a foundation on which organizations can build by adding their own detail and compiling other data sets**

[FGDC – NSDI Framework](#)

# OMB A-16, 2002 – Appendix E: NSDI Themes, Definitions, Lead Agencies

• Baseline (Maritime)	• Federal Land Ownership Status	• Outer Continental Shelf Submerged Lands
• Biological Resources	• Flood Hazards	• Public Health
• Cadastral	• Geodetic Control	• Public Land Conveyance (patent) Records
• Cadastral (Offshore)	• Geographic Names	• Shoreline
• Climate	• Geologic	• Soils
• Cultural and Demographic Statistics	• Governmental Units	• Transportation
• Cultural Resources	• Housing	• Transportation (Marine)
• Digital Ortho Imagery	• Hydrography	• Vegetation
• Earth Cover	• International Boundaries	• Watershed Boundaries
• Elevation Bathymetric	• Law Enforcement Statistics	• Wetlands
• Elevation Terrestrial	• Marine Boundaries	
• Buildings and Facilities	• Offshore Minerals	
		Total: 34
		Framework Themes

- Themes of national significance, providing the core, most commonly used base data, are framework data
- Specifically – the 7 listed in the framework (divided into 9 by Circular A-16)
- Other **themes of national significance** are also an important part of the NSDI and must be available to share

# National Geospatial Data Assets (NGDAs)

---

"In 2010 and 2011, Federal data managers for geospatial data will move to a **portfolio management approach** ... *President's Budget, Fiscal Year 2011*

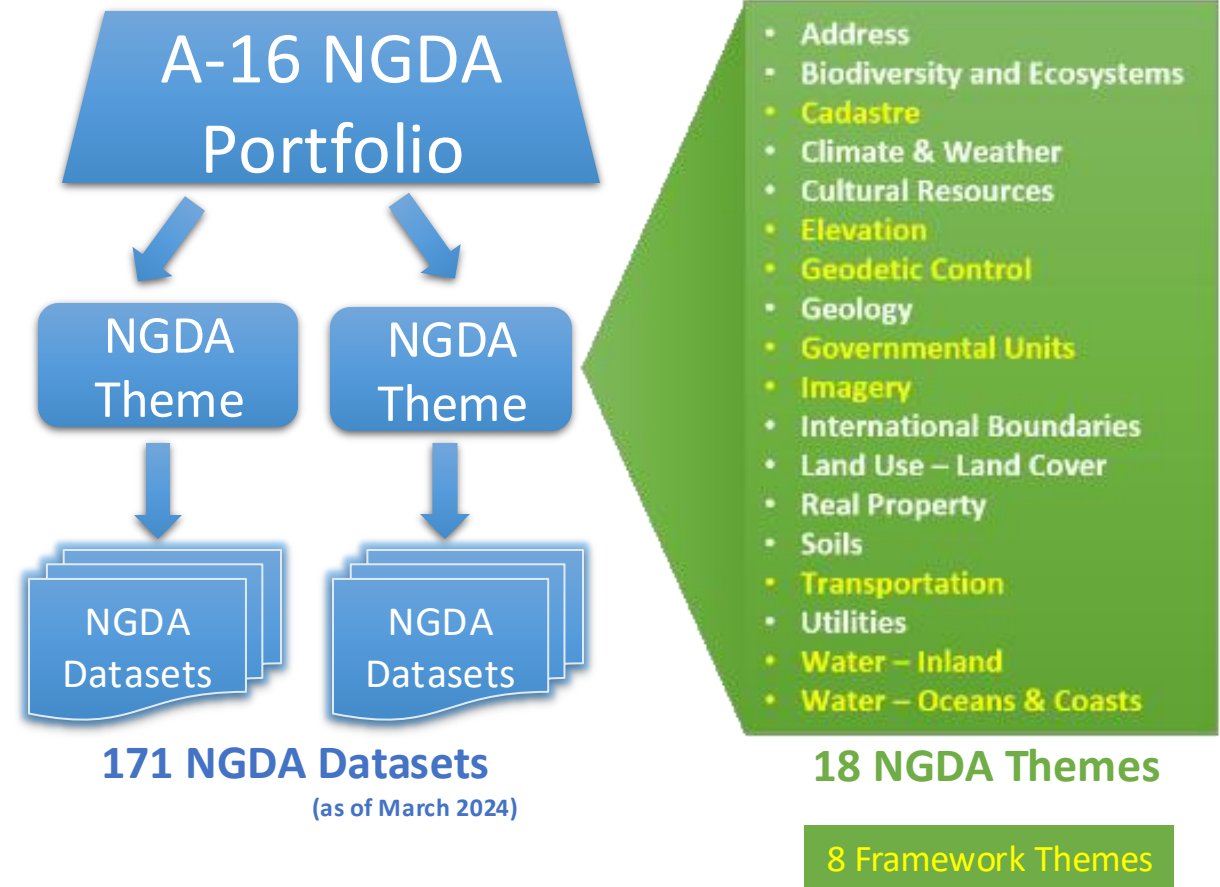

- Federal agencies directed to shift focus from geospatial data lifecycle management to Federal geospatial portfolio management.
  - Intended to break down agency data silos by creating a single, Federal Geospatial portfolio of data available for addressing any priority or issue
- Circular A-16 Appendix E, Data Themes, was updated to:
  - Make the list of data more relevant and current
  - Normalize the list for management purposes
  - Align it into a dataset to theme portfolio management structure
  - In some cases, to align with agency oversight and mission responsibilities

# NGDA Themes and Dataset Structure – Established 2011

## NGDA Selection criteria

(one or more)

- Used by multiple agencies or with agency partners such as State, Tribal and local governments
- Needed for Presidential priorities as expressed by OMB
- Required to meet shared mission goals of multiple Federal agencies
- Expressly required by statutory mandate

# Framework Themes, Data Constructs, Metrics

---

- National interest in developing the NSDI and Framework
- GDA directs plans for national development of NGDAs and meeting the needs of users, and developing partnerships
- Coalition of Geospatial Organizations (COGO) assessments of the NSDI and the framework data, 2015, 2018 (2024 coming soon)
  - 2018, Addresses was added to the 7 original Framework layers
- The content of the datasets making-up the NGDA Framework Themes and the COGO Theme assessments - differ
- Need to identify and define the Themes and their data content
  - Common requirements for availability, access, use
  - Common metrics for measuring Framework and NSDI progress

# National Dataset Successes

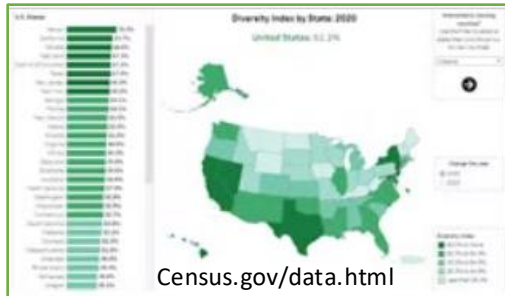

- 3D Elevation Data – Lidar and IfSAR, elevation products
  - National Digital Elevation Program, USGS leadership, in A-16 policy, detailed needs and ROI assessment, almost a 5:1 ROI, utilized the private sector, partnerships with cost share, well defined data requirements, 2015-2023: Total \$984.5 mil, with 62% partner cost share, and 94.7% area acquisition, plan for National coverage by 2026 (budget dependent)

# Challenge

---

“When conditions are sufficient things manifest.” *Budda*

*For the NSDI national data layers, what are those conditions?*

*What makes them sufficient?*

*How might new approaches, innovations, collaboration, new technologies help?*

# Questions?

---

FGDC.GOV
