# GeoSmart India: Celebrating 25 Years of Driving India's Geospatial Transformation

2025 marks a historic milestone — the 25th Silver Jubilee edition of **GeoSmart India**, a platform that has, for over two decades, shaped the geospatial narrative of the nation. From creating awareness about geospatial technology to initiating dialogues on geospatial policy and facilitating collaborations across diverse domains — Agriculture, Urban Development, BFSI, Land & Property, Disaster Management, Defence, and more — GeoSmart India has been the epicenter of India's geospatial awakening and action.

This year, we elevate the experience with the launch of the GeoSmart India EXPO — a comprehensive and dynamic exhibition ecosystem, embedded with experiential learning, state showcases, and cutting-edge innovation. This transformation marks a shift from just an exhibition to a powerful knowledge and networking hub.

## Theme: One Nation. One Map – Advancing Geospatial Infrastructure for National Sovereignty and Economy'

One Nation, One Map envisions a unified digital geospatial platform that brings together all Indian states and union territories under a single, standardized mapping framework. This initiative aims to replace fragmented, state-specific mapping systems with a comprehensive and interoperable digital map of India, ensuring data consistency, accuracy, and accessibility across administrative boundaries.

By integrating geospatial frameworks at the national, state, and local levels, the initiative lays the foundation for cohesive planning, seamless data exchange, and collaborative governance across ministries, departments, and state governments. This unified map will power a wide range of public programs—from infrastructure development, land and water management, and smart city planning, to disaster response, resource monitoring, and climate resilience.

“One Nation, One Map” is not just a vision—it's a strategic step toward building a digitally connected India, where all states contribute to and benefit from a shared geospatial infrastructure. The result is a smarter, faster, and more inclusive approach to national development—one map, one mission, one future.

## Who Should Attend GeoSmart India 2025?

GeoSmart India is the definitive platform for all stakeholders shaping India's geospatial and digital infrastructure landscape. Whether you're driving policy, building technology, or delivering impact on the ground—this is where your journey connects with opportunity.

- **Government & Public Sector**
  - **End-User Industries**
  - **Professional Experts & Consultants**
  - **Technology & Industry Experts**
  - **Innovation & Startup Ecosystems**
  - **Academia**
- Many More...

# Conference Program

Join the conversation towards a geospatially empowered India.

Submit your abstract and contribute to the One Nation – One Map vision — driving integration, innovation, and informed decision-making through the power of geospatial intelligence.

## Symposiums - 2 Day Programs

Agriculture

Urban Development

Water Resource Management

Digital Public Infrastructure (DPI)

Land

Geospatial Knowledge Infrastructure (GKI)

## Seminars - 1 Day Programs

Blue Economy

Education Summit

Climate Change and Disaster

## Technical Session

Data Science

Geospatial Block-chain

Spatial Computing

State Symposiums

## Impact Programs

Digital Village

Diversity, Equity, and Inclusion (DEI)

Workshops & Training

Partner Programs

**Want to be a speaker at GSI2025?**

**Submit your abstract before**

**15th August 2025**

**Write to us for more information**

**Papers@geosmartindia.net**

## EXHIBITION DATES

2-4 December 2025

**8000 SQM  
EXPO SPACE**

## Expo at #GSI25

### India's Largest and Leading Geospatial and Allied Technology Conference & Exhibition

The Expo offers a vibrant and immersive platform featuring innovative technologies, live demonstrations, state showcases, and interactive experiences.

More than just an exhibition, the Expo is a dynamic hub for knowledge exchange, strategic networking, and forging impactful collaborations that drive India's geospatial future. Whether you're a startup, government body, or private organization - this is where your ideas grow and connections thrive.

#### Why Exhibit?

##### Showcase Ideas at Scale

Exhibit across 8000 sqm of dynamic space featuring product demos, live tech applications, and immersive experiences.

##### State Seminars & Pavilions

Dedicated state-focused sessions where progressive state governments will present success stories, flagship projects, and department-wide geospatial deployments.

##### Engage with Decision-Makers

Connect with 500+ organisations and delegates from 50+ countries—spanning government, industry, and academia.

##### Demonstrate Real-World Impact

Take the stage through live demo slots and open-stage opportunities to launch products and highlight real-time use cases.

##### Collaborate with Government & Academia

Participate in state-led seminars and partner with leading academic and research institutions to drive innovation and talent development.

##### Deliver & Attend Skill-Focused Masterclasses

Host or join practical tutorials on GIS, LiDAR, Drone Mapping, AI/ML, and more—ideal for professionals and students (with digital certification).

##### Create Immersive Experiences

Leave a lasting impression through interactive zones—like VR smart cities, UAV fly zones, and simulations on urban planning, forest monitoring, and disaster response.

**Early bird INR 25000 per  
sqm valid till 30th June**

1st July onwards INR 27000 per sqm.

# GEO SMART INDIA AWARDS

GeoSmart India stands as a hallmark of prestige, spotlighting outstanding examples of innovation and excellence within the geospatial sector. Renowned as the most premium award ceremony, it is judged by an eminent jury of experts and honors exceptional individuals and organizations.

**Leadership  
Awards**

**Excellence  
Awards**

**Last Date of Nomination Submission: 15th September 2025**  
**For more information write to us: [Awards@geosmartindia.net](mailto:Awards@geosmartindia.net)**

## Media

Journalists from the country's most influential publications will gather in December with the people and companies redefining nation development goals and tech. Will you be one of them?

Please note that applications for media accreditation are subject to our media accreditation policy.

**For more information write to us:**

## Past Exhibitors

## What Leader's say about #GSI24

“ Despite the challenges, the real excitement lies in unlocking the immense potential of geospatial technology and seeing how it empowers industries to grow and innovate. ”

**Srikant Sastri**

Chairman, Geospatial Data Promotion & Development Committee (GDPDC)

**Sanjay Srivastava**

Chief, Disaster Risk Reduction, United Nation The Economic and Social Commission for Asia and the Pacific

“ Geospatial knowledge infrastructure (GKI) is critical for building resilience, reducing disaster risk, and achieving climate justice. It is an essential tool for addressing the challenges we face in a changing world. ”

“ The challenge is to put together global and local data on a single platform— accessible to everyone, usable by anyone, and intuitive enough to ensure all efforts in mitigating hazard scenarios are not in vain. ”

**Vishnu Chandra**

Advisor, National Informatics Center (NIC)

“ India is truly in a golden period for the geospatial sector... these forward-looking policies have propelled the use of geospatial technologies and content in the country, and India is taking steps to support other countries in the path to fulfill the vision of our Prime Minister to make India a geospatial leader on the world stage. ”

**Agendra Kumar**

Managing Director, Esri India

“ The future of infrastructure engineering is open, it is flexible, collaborative, and built on a foundation of data that can be shared securely. ”

**Nicholas Cumins**

CEO, Bentley System
