# Redefining Next-Gen Infrastructure

Through Data, Intelligence, and Resilience

Anwaar Alshimmari

# Static Assets. Connected Systems. Intelligent Infrastructure

- From **physical layers** to **data ecosystems**
- From **reactive decisions** to **predictive intelligence**
- From **infrastructure** to **national intelligence capacity**

# Data. Intelligence. Resilience.

## **DATA**

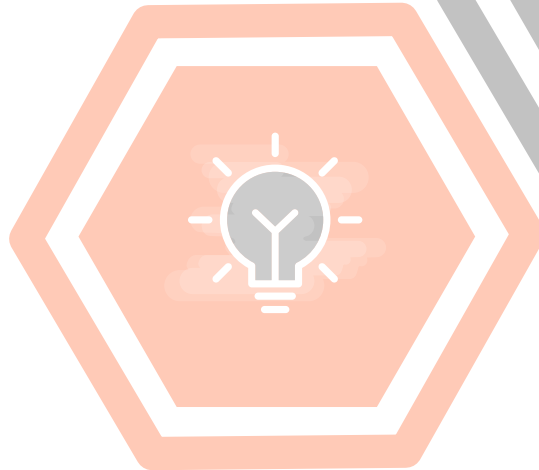

- Real-time, authoritative
- Interoperable
- Governed

## **INTELLIGEN**

### **CE**

- AI-driven insights
- Predictive analytics
- Decision support

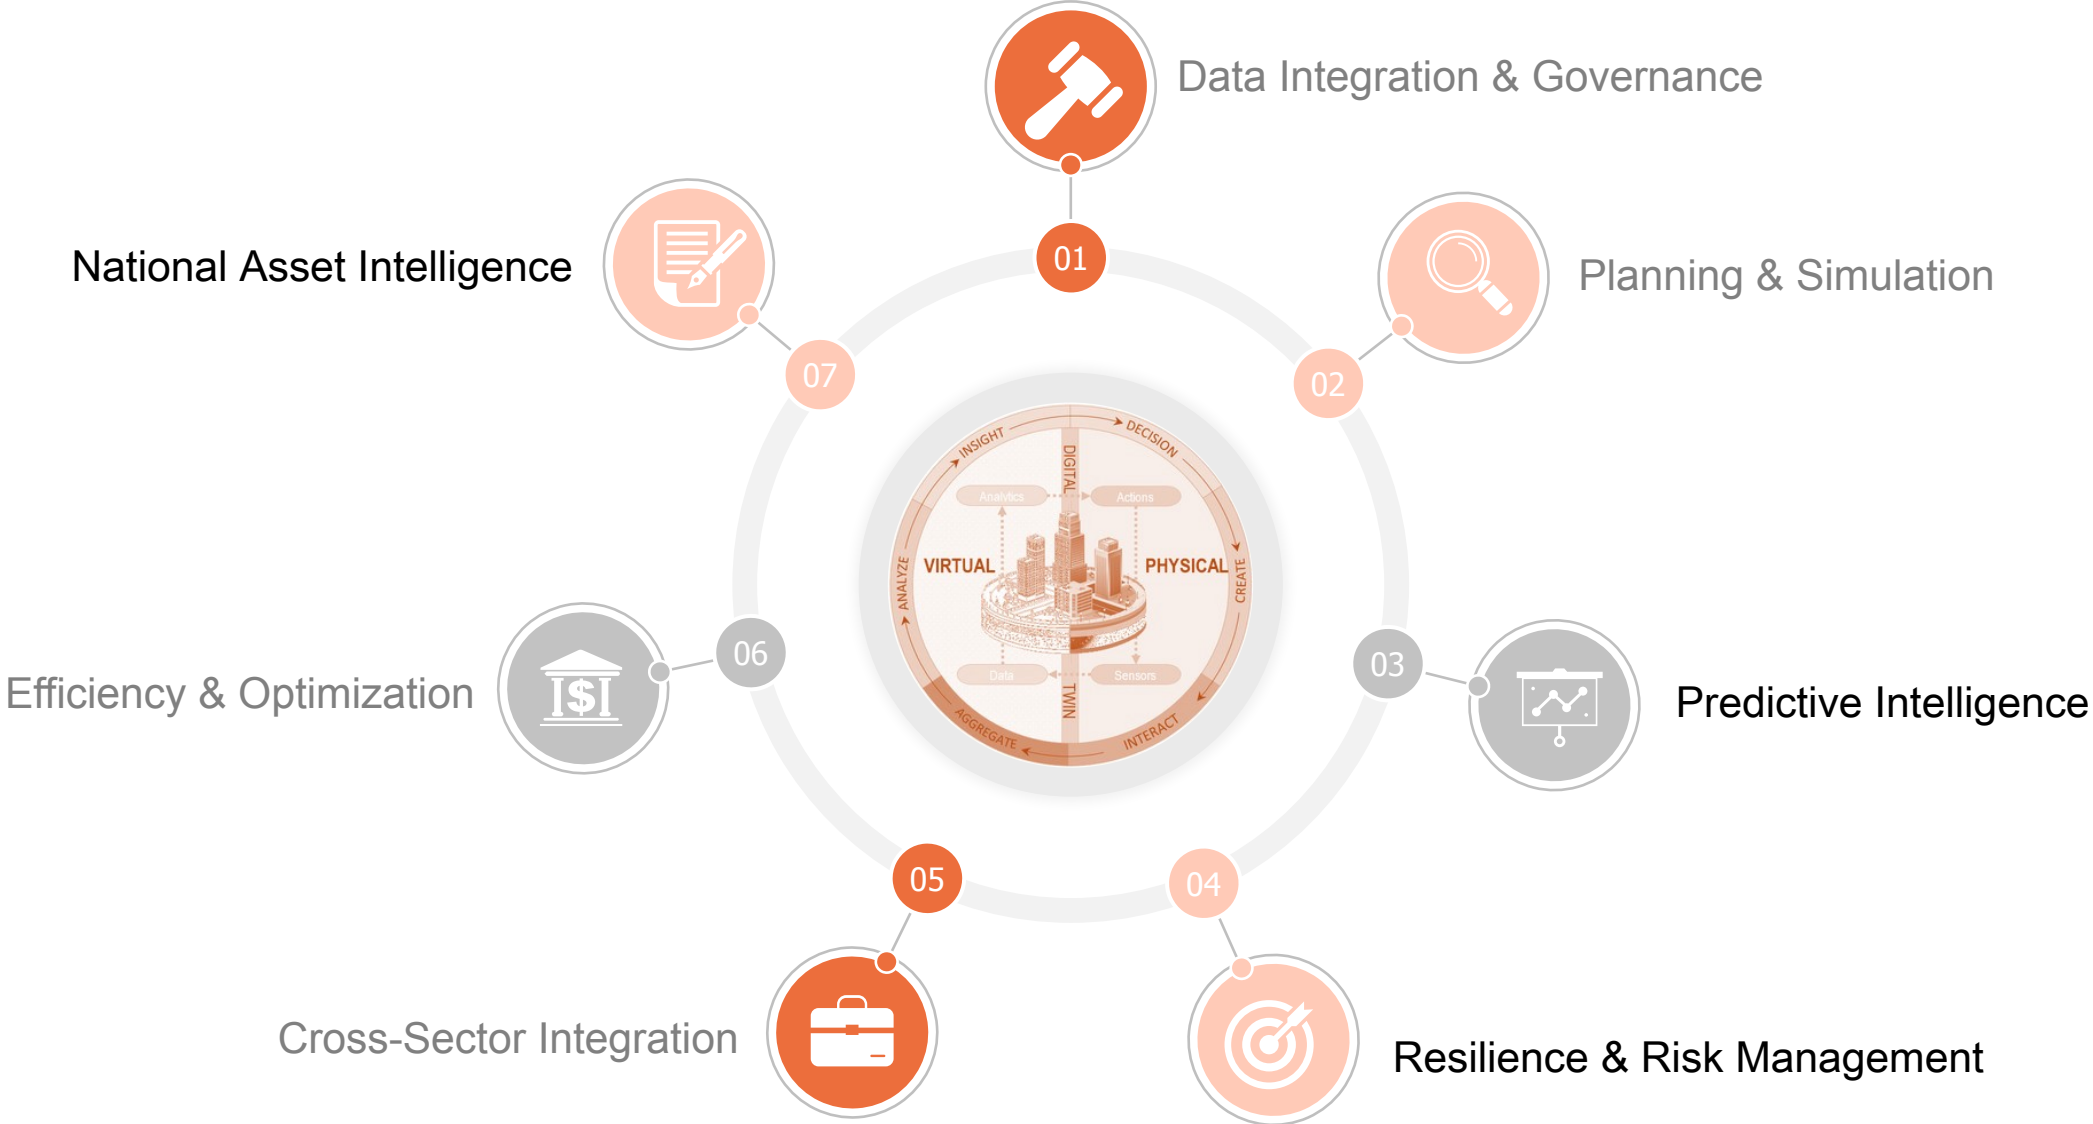

## **RESILIENCE**

- Adaptive systems
- Risk-aware
- Continuity-focused

# From Data to Decision Intelligence

DATA → INTELLIGENCE → DECISION → ACTION

# Resilience is Not Protection... It is an adaptation

- **Predict disruptions before they occur**
- **Adapt systems in real time**
- **Integrate across sectors**

# Infrastructure for the Autonomous Age

- Strong **geospatial governance frameworks**
- Integrated **national data ecosystems**
- Cross-sector **interoperability**
- AI-powered **decision systems**
- Sovereign **data capabilities**
