Benefits and Impact

Industry Focused Training and Education

IIC Academy provides specialized training in hydrography, offshore surveying, and geomatics, designed to meet industry standards and prepare professionals for real-world applications.

Certification

Courses align with the International Hydrographic Organization (IHO) Standards and can contribute to internationally recognized certification schemes, helping professionals advance their careers.

Flexible Learning Options

With online, blended, and in-person training options, IIC Academy caters to a wide range of learners, from early-career professionals to experienced surveyors seeking to upgrade their skills.

Academy Programs

S-100 Training

IIC Academy's S-100 training program provides specialized instruction on the International Hydrographic Organization's (IHO) S-100 framework, which serves as the foundation for next-generation digital hydrographic and marine geospatial data. The Training equips professionals with the knowledge to implement, manage, and utilize S-100-based products, ensuring compatibility with evolving e-Navigation and marine data standards.
