**Satellites
Track Record**

AXELSPACE

Our Track Record

Since the establishment, we have developed and operated 11 satellites

Unique Business Structure

Leveraging our microsatellite technology, we are engaged in two businesses, “AxelLiner” and “AxelGlobe”.

**Microsatellite Technology
(Development & Manufacturing)**

Entrusted with the entire process from development to operation of **Customer Satellites**

Customer satellites

Development → Manufacturing → Launch → Operation

Provide Satellite Imagery and related service with **Our Operating Satellites**

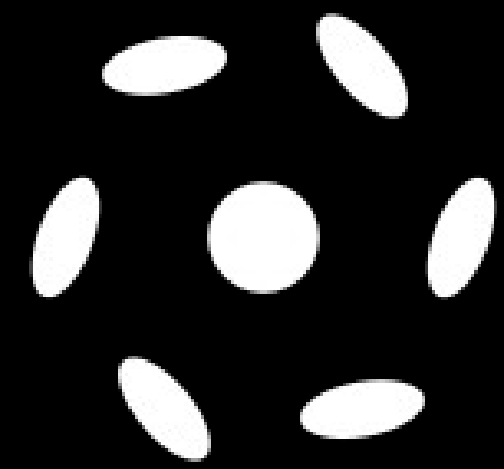

Our own satellites

(Imagery data sales / consulting and analysis service)

Development >>> Operation

Data acquisition / analyze

Imagery data sales service

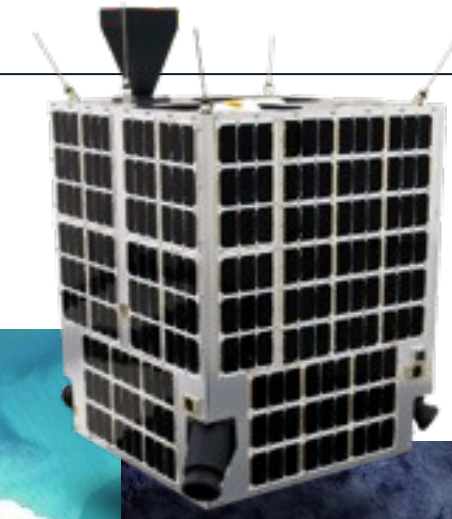

AxelGlobe

Sensing the world, changing the future.

Explore the World in Your Way with AxelGlobe

GRUS-1 Satellite

Ground Resolution

2.5m

Swath

55km

Bisat oil field (Oman)

Toraga Bay (New Zealand)

Luanda (Angola)

Wuhan (China)

Turning Satellite Images into Insights That Drive Smarter Decisions

Visible and Understandable

▲ Vegetation health levels are represented with color coding

- Healthy
- Unhealthy

Changes Over Time

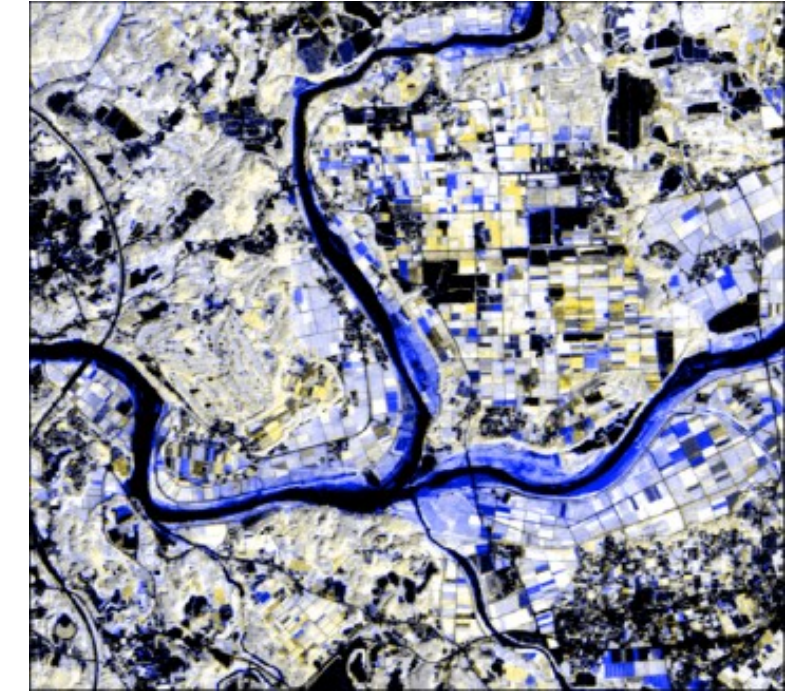

▲ Detecting Areas of Deforestation via Satellite Imagery

Making Information Measurable

▲ AI-Powered Automatic Detection of Cargo Vessels

Monitoring and Assessing the Situation

▲ Flood-prone areas are shown in blue

Expanding AxelGlobe Constellation by Next-Gen Satellites

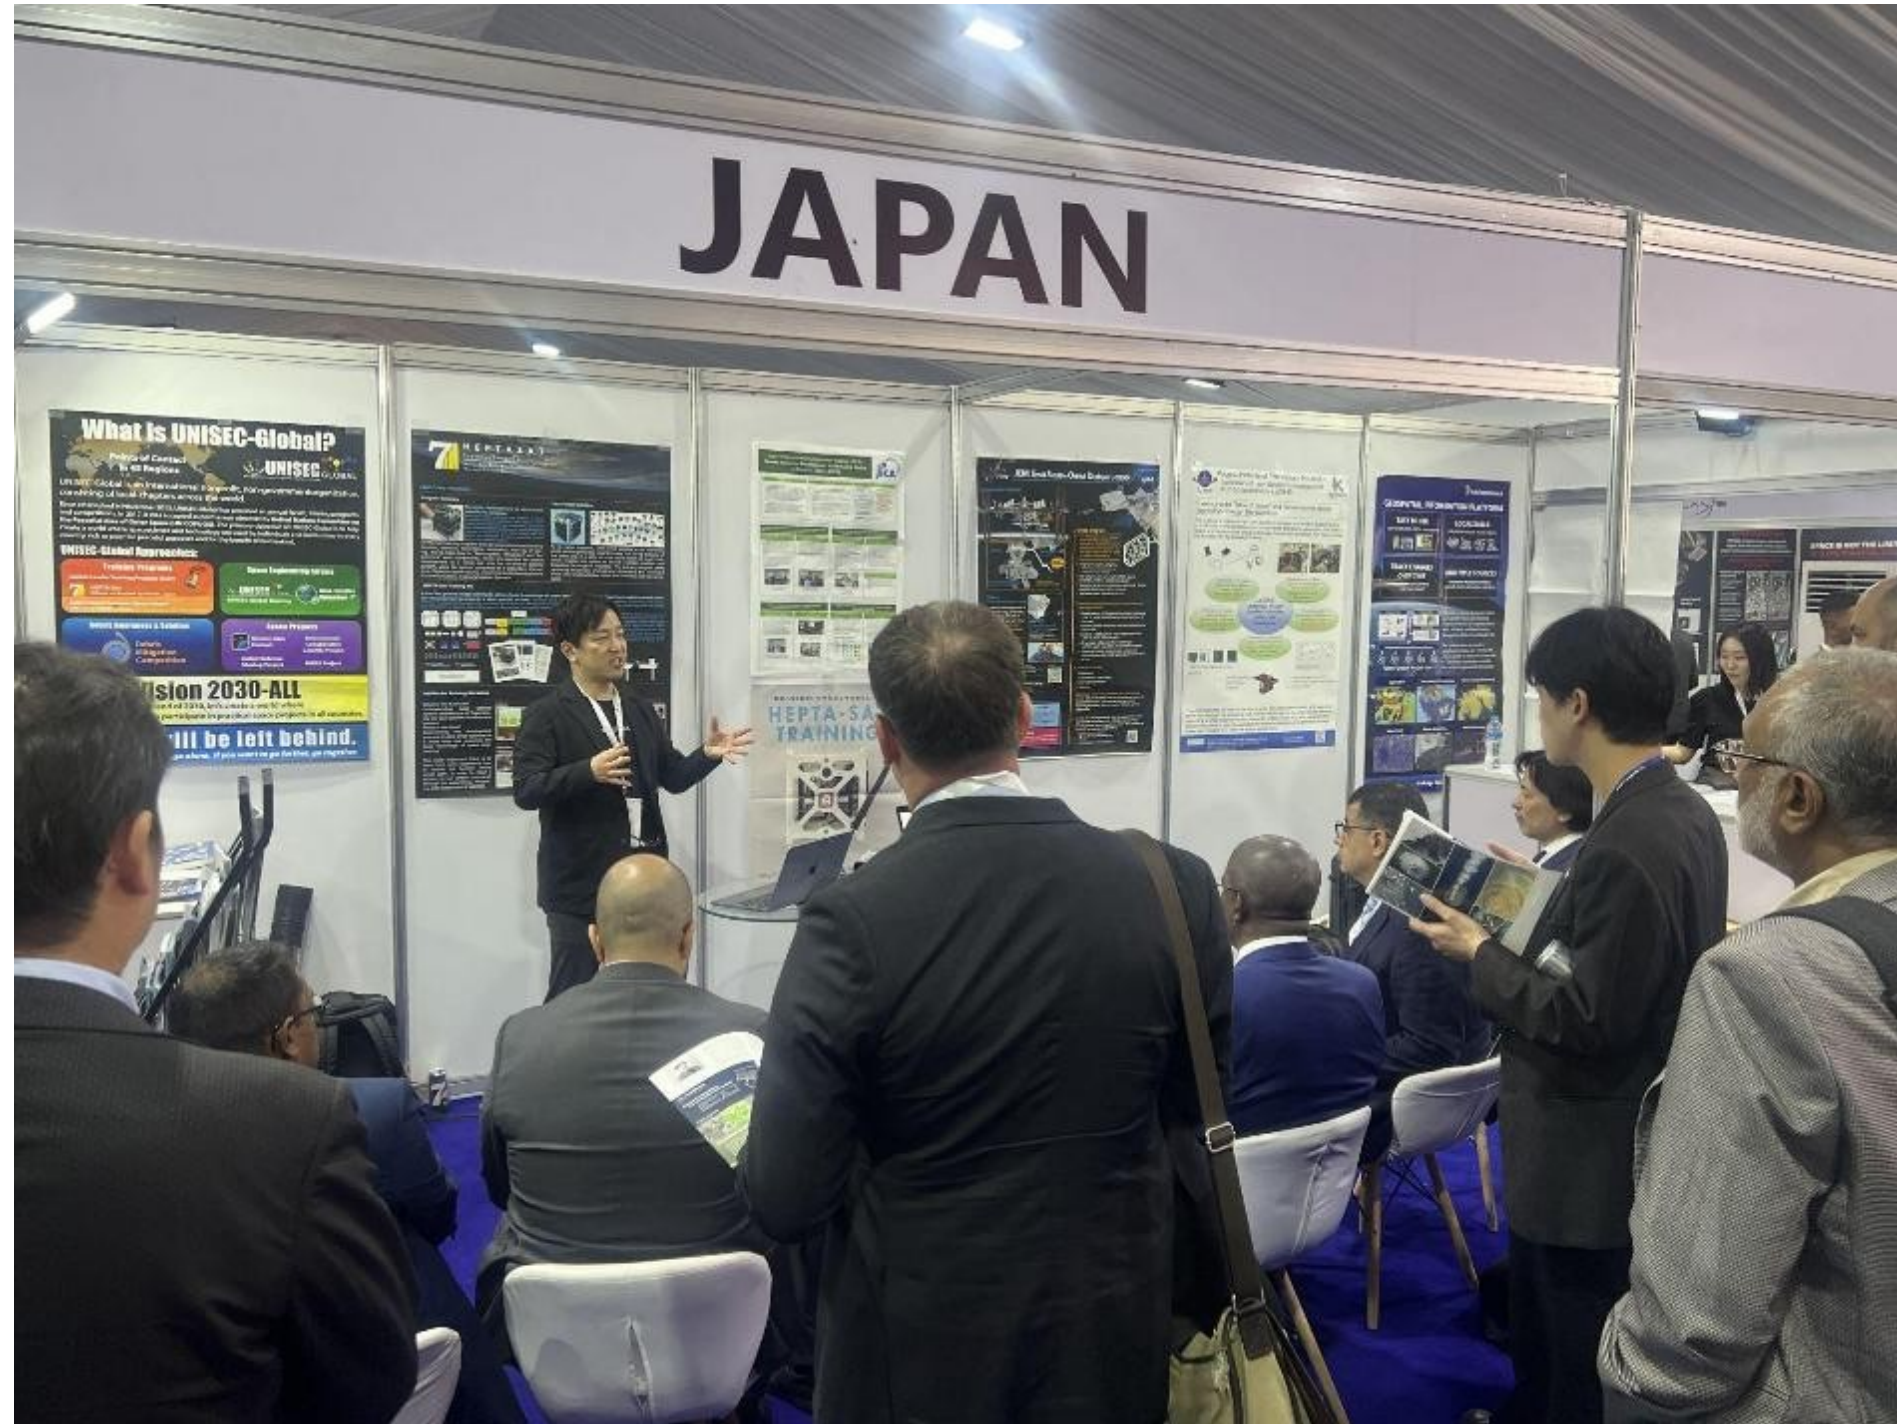

Launching 7 units in 2026

GRUS-3

 Revisit Rate	1-2 days
 Ground Resolution	2.2 m
 Swath	28.3 km
 Spectral Bands	Panchromatic, Coastal Blue, Blue, Green, Red, Red Edge, Near Infrared

Past Activities for Collaboration with Africa

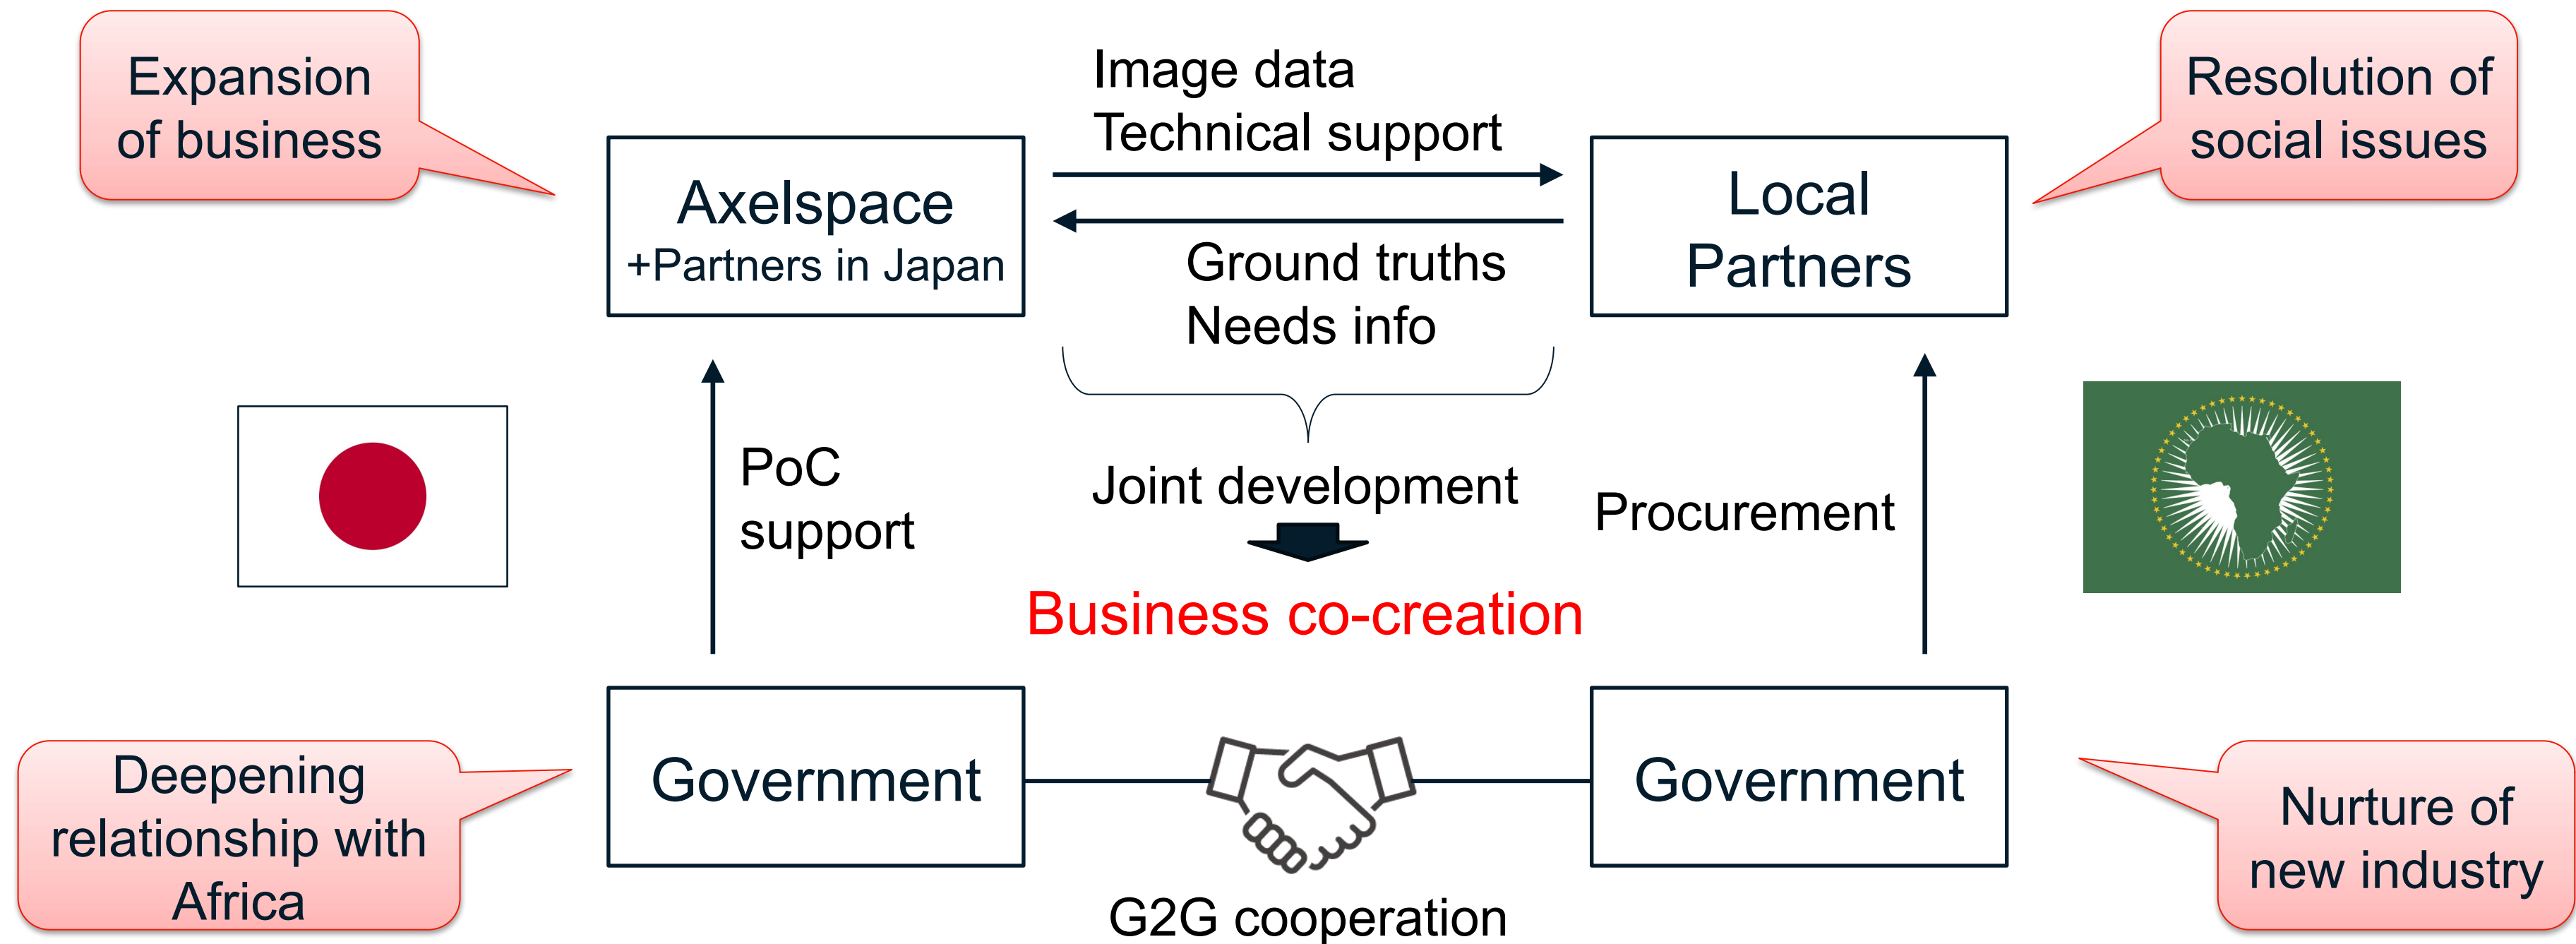

▲ Newspace Africa Conference (April 2025)

▼ TICAD Business Expo & Conference (August 2025)

Win-win Relationship: Creating New Values Together

We are eager to work together with partners in Africa to create tangible solutions to solve social issues
